

Freshman Year: The first year of the CORE introduces you to academic, community and spiritual life at Arizona Christian University. Your first year in the CORE lays a strong foundation for thinking critically and biblically as you begin to learn how to transform culture with truth.

Sophomore Year: The second year of the CORE introduces you to the first two Humanities courses and linked Bible courses that enhance your understanding of the same time period.

Junior Year: The third year of the CORE focuses on the modern age, when the ideas of human history challenged biblical authority. At the same time, people of faith developed the theology and apologetics necessary to answer to the those challenges that we still face today.

Senior Year: The senior year of the CORE provides a culminating academic Capstone that ties the CORE curriculum, your academic major, and your experiences at ACU together.

**Ready to Transform
Culture with Truth**
